could go on. I noticed his voice was raspy as he spoke to me at that time.

He pulled ahead of me and came to the stop sign located at Lenoir St and E Union St. He rolled slowly through the stop sign with me behind him. I pulled out behind him and as we went through the intersection of E Union St and Bouchelle St turned on my red/blue lights. The defendant pulled into the parking spaces to the left in front of The Pickled Peach (at a slight angle and taking up 2 spaces).

I approached the passenger side of the vehicle and explained to him why I had stopped him. During this time I noticed his speech was still raspy and there was some slurring. His face was slack in appearance. I had him exit the vehicle to perform some field sobriety tests.

The defendant had a bad knee so I administered an HGN/VGN test, sway test, finger to nose test and alphabet recitation test. I noticed signs of impairment during his performance of the tests. I also observed a white powder residue in and around his left nostril. I formed the opinion that he had consumed a sufficient amount of an impairing substance to appreciably impair his mental and physical abilities. I believe that he was impaired by a controlled substance. I placed him under arrest for DWI at that time.

I searched the defendants vehicle and located a plastic straw in the lower center dash pocket. The plastic straw was coated inside with a white powder residue similar in appearance to what I had observed in and around the defendants nose.

I brought the defendant to MDPS and he cooperated with a drug evaluation. I confirmed my opinion as to his impairment and the category of impairing substance. I read the defendant his chemical test rights and he agreed to provide a sample of blood for the test.

We went to CMC-Morganton and had a sample of blood drawn. It will be sent to the SBI lab for testing.

I took the defendant before the magistrate and he was [placed in jail under a custody release. The straw was placed into evidence under tag # 21188.
